Mortar Admixtures Concrete Additives PCE Polycarboxylate Ether Superplasticizer

Introduction

Mortar Admixtures Concrete Additives PCE Polycarboxylate Ether Superplasticizer is an Eco-friendly new generation high performance polycarboxylate ether superplasticizer developed by our company with DD-912 (EPEG 3000, C6 polycarboxylate ether monomer) as main raw material.

Characteristics

1. High water reducing ratio: Excellent dispersion and water reducing ratio can attain 30% or above at saturated dosage, which assures improving the workability of concrete, enhancing the concrete strength and saving cement application amount. 2. Good slump retention performance: It can well delay the transporting and on-site retention time of the concrete, assure the pumping performance of the concrete.

Application

1. It is applicable to ready mix concrete, premixed or precast concrete for industrial and civil architectures, especially to low grade commodity concrete.
2. It is particularly applicable to various national construction works with

high performance requirements for the concrete, such as water industry, marine works, seaports, traffic, electric power etc.

3. It is applicable to special concrete, such as high strength, high durability, self-compacting concrete.

Quick Details

Warranty:1 Year

After-sale Service:Online technical support

Project Solution Capability:total solution for projects

Application:Office Building

Design Style:Industrial

Place of Origin:China

Mobile/Wechat:0086 13053363281,0086 17865273019

Mail:sales@zhuoxingchem.com,sales02@zhuoxingchem.com

Brand Name:ZX

Model Number:liquid

Appearance:White or light yellow viscous liquid

Density: 1.10 ± 0.02

pH value:5-7

Solid Content: 50 ± 1.0

Cl-: ≤ 0.02

Total Alkali: ≤ 0.3

Function:High Water Reducer Rate

origin:china
